MyGrader – School Compliance Overview

Purpose

MyGrader is a teacher-controlled platform designed to support consistent grading, structured feedback and assessment moderation while fitting alongside existing school assessment systems and workflows.

Student Data & Privacy

Privacy by Design

MyGrader is designed to minimise the collection of student personal information.

- No student accounts are required
- No student email addresses are collected
- No student names are required
- Students access activities using teacher-generated links or QR codes
- Teachers control all student access and submissions

Student assessment data is used solely to generate grading, feedback and task-specific learning support aligned with teacher-defined criteria.

Student assessment data is never sold, shared or provided to third parties.

Infrastructure is hosted within Australia.

Student Safety

MyGrader operates within clear educational boundaries designed for school use.

- Students do not have access to open-ended AI chat, search or generative tools
- Students cannot communicate with other users through the platform
- Students access only the specific tasks, worksheets or activities shared by their teacher
- Student interaction is limited to teacher-controlled submissions, worksheets and task-specific activities

---

Use in Schools

MyGrader is designed to support existing school assessment practices rather than replace them.

- Supports existing assessment processes including criteria, rubrics, exemplars, competencies and moderation practices
- Fits alongside existing school assessment and reporting systems

- Does not require student accounts or additional student login management
- Teachers determine what content is submitted and how results are used
- Teachers retain control of grading decisions and feedback

System Boundaries

MyGrader is not an open-ended AI platform.

- Operates only within teacher-defined tasks, criteria and learning activities
- Generates feedback based on teacher-provided assessment materials
- Supports teacher professional judgement rather than replacing it
- Does not provide unrestricted student access to AI tools

Why MyGrader Uses This Approach

MyGrader is designed to support existing school assessment practices while minimising student data collection. Rather than requiring student accounts, email addresses or unrestricted access to AI tools, MyGrader uses teacher-controlled workflows, structured assessment activities and secure submission links.

This approach helps schools maintain control over assessment processes while reducing privacy, security and student safeguarding concerns.

Summary

MyGrader provides a structured, teacher-controlled environment for assessment and feedback while minimising student data collection and maintaining clear operational boundaries.

Key principles include:

- Minimal student data collection
- No student accounts or email addresses
- Australian-hosted infrastructure
- Teacher-controlled workflows
- Support for existing school assessment practices
- Student-safe operation within clearly defined boundaries
- Support for teacher professional judgement
